GOVERNOR GREETING

Dear Friends:

It is my pleasure to extend greetings and well wishes for a happy and healthy 2023.

Throughout 2022, the Javits Center has been a vital partner in bringing events and tourism back to New York City. It continues to be a nexus for collaboration as well as a place where industry leaders gather to create comprehensive and innovative ideas. In addition, this iconic venue has quickly become a leader in sustainability through the maintenance of a rooftop wildlife sanctuary, one acre rooftop farm, and solar panels: the largest of its kind in Manhattan.

However, it is not only a place for intellectuals to gather but also a place of refuge for the community. The Javits Center was vital during the COVID-19 pandemic by transforming into a hospital that treated over 1,000 patients as well as a vaccination center where more than 646,000 vaccines were administered.

The Javits Center's support of the State is invaluable, and it continues to be a pillar within the community. I look forward to our important work together.

Sincerely,

A handwritten signature in black ink that reads "Kathy Hochul".

Kathy Hochul

CEO GREETING

Our halls are bustling, our event calendar is filling up and our rooftop is turning into an ecosystem unlike any other in New York City.

The Javits Center is back to business in every way possible, and we're certainly looking forward to the months and years ahead. We're in the midst of an industry resurgence, at home and across the United States, and while there were many doubters during the pandemic, we are happy and honored to prove them wrong.

This good news would not be possible without the confidence of our customers and their trust and belief in our organization. And thanks to the dedication and commitment of our employees, the Javits Center has emerged stronger and more vital than ever before.

Face-to-face meetings have never been more valued, and therefore, we're expecting to reach pre-pandemic levels of activity in the coming months. Backed by a new expansion and other infrastructure improvements, we've been excited to reconnect with so many business leaders and demonstrate the importance of our industry.

In many ways, the Javits Center is much more than a convention center, but our primary mission has always been – and will be – to strengthen the local economy. It's clear that serving as a place where people from all walks of life can gather, share critical information and exchange ideas retains a special role in our society, and it is one we take seriously. In its first full season, our rooftop farm has generated a tremendous amount of produce, which has been incorporated into the meals we serve on site. And thanks to a partnership with the New York Power Authority and Siemens, we have installed the largest rooftop solar array in Manhattan – a remarkable and renewable source of energy.

The Javits Center was built by New York for New York, and we're proud to continue supporting the Empire State and move our world forward, together.

Sincerely,

A handwritten signature in black ink that reads "Alan Steel". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.

Alan Steel

INTRODUCTION

The Javits Center is back!

In 2022, the Javits Center has bounced back with a flurry of large-scale events throughout the six-block campus on Manhattan's West Side. Fueled by a surge of excitement and enthusiasm among event organizers and exhibitors from around the world, the number of hosted events increased compared to the prior year, including an encouraging 14% spike in the last four months of the calendar year.

With the dynamic spaces of the 1.2 million square-foot expansion open and available, as well as a series of new hires and operational improvements, the Javits Center continued to prove why business in North America begins here – as a platform for cutting-edge business products and practices.

The busiest convention center in the United States is busy once again.

RESURGENCE

10 | YEAR IN REVIEW 2022

From annual trade shows to new conventions to breakthrough events, the demand for in-person meetings was on full display at the Javits Center in 2022 as our halls teemed with an energetic fervor not seen since before the pandemic.

Industry-leading events returned to the convention center while new corporate-focused events took center stage throughout the year, introducing new audiences to the Javits Center and paving the way for future business opportunities.

Since August 2021, nearly 50 events booked spaces in the expansion, now known as North Javits, and as a result of that business and the bookings ahead, we expect to reach pre-pandemic levels of activity by 2024 – a positive sign for our entire industry. As New York’s largest convention center, the Javits Center serves as one of the state’s greatest economic assets,

supporting thousands of jobs in the hotel, restaurant, transportation and tourism industries. Prior to the pandemic, the Javits Center supported up to 18,000 jobs a year, directly and indirectly, generated up to \$2 billion in annual economic activity and attracted more than 39,000 exhibiting companies each year.

To get back on track, Javits Center management has implemented a back-to-basics program designed to encourage employees to complete outstanding projects and revisit pending tasks that could increase operational efficiency and further improve customer service. New training sessions also have been

implemented, including sensitivity and diversity training to create a safe and healthy environment, as well as management training for decision-makers and safety training for the labor workforce. Several industry veterans have been hired to fill key managerial positions and add new resources to event operations, while public tours of the building have resumed, giving local corporations, non-profit groups and community members an inside look at the convention center.

This comes as New York City recovered 85 percent of its record 2019 visitation, welcoming 56.4 million visitors in 2022. Strong demand for meetings, conventions and events in the City continued with 800,000 group nights on the books through the end

of the year. "We are pleased to say that New York City's meetings industry is right on track. With a busy conventions and events calendar still ahead this fall, and hotel performance consistently trending above 85 percent occupancy once again and more than 10,000 new rooms in the pipeline, we are confident in New York City's ongoing tourism recovery and the continued comeback of the business travel sector," said Fred Dixon, President and CEO of NYC & Company.

NEW HOSPITALITY LEADERS

New leaders have joined the Javits Center team in recent months, adding expertise, experience and new insight on how to provide an unparalleled experience at the convention center in the heart of the greatest city in the world.

AN ELEVATED DINING EXPERIENCE

With new hospitality leaders and a new emphasis on face-to-face meetings, we're more focused on improving the dining experience than ever before. We've added new customized seating and tables to encourage both group engagement and private meetings, and we've redesigned and renamed our food halls to deliver the latest trends in cuisine – including our homegrown produce!

Thanks to our new hospitality team, Cultivated, an innovative collaboration among Levy, CxRA and the Javits Center, the culinary program has become a signature feature of the expanded Javits Center, and our on-site chefs are creating unique and exclusive menus for each event – utilizing fresh produce grown only steps away on our new one-acre rooftop farm.

ON THE NATIONAL STAGE

With a blockbuster expansion in full swing, the Javits Center is hosting more new events than ever, introducing its flexible halls to new clients from around the world.

From August to December 2022, we hosted 15% more events compared with the same period in the previous year, demonstrating that the value of in-person meetings is more important than ever. Among them was a series of new events and audiences such as the International Gynecologic Cancer Society Annual Meeting, Amazon Unboxed, YPO Edge and the Obama Foundation Democracy Forum.

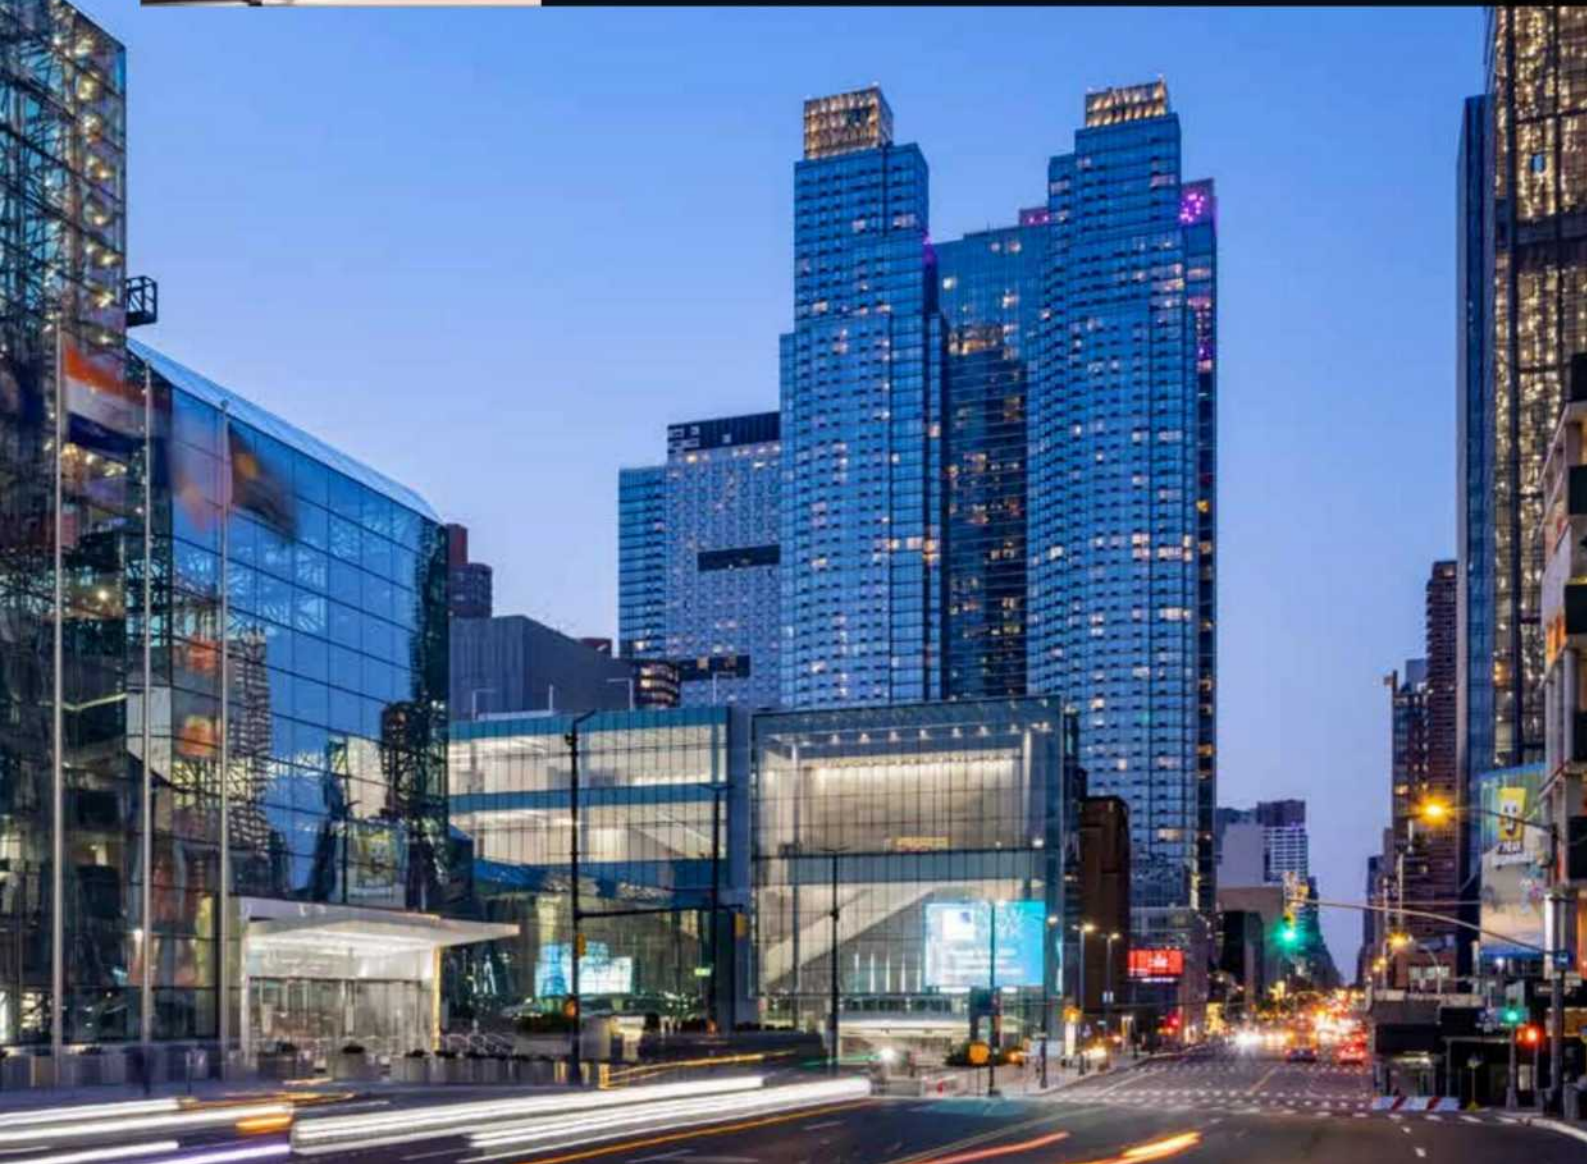

SECTION SPOTLIGHT

ON THE ROAD

Leaders at the Javits Center traveled across the country and the globe to promote New York City as an event destination, as well as the impact of our sustainability efforts! Our CEO Alan Steel participated in COP26 in Glasgow, Scotland, our Director of Energy and Sustainability Jacqueline Tran delivered remarks in Philadelphia and our Director of Sales and Marketing Lisa Lopez attended the IMEX America in Las Vegas with our partners at NYC & Company. There's never been a better time to visit Manhattan's West Side, and our staff is proud to tell everyone why!

The image features a collage of various cityscapes and construction sites. Large, semi-transparent yellow letters spell out 'REBUILD' across the top and middle. The background includes tall skyscrapers, a construction crane, and a large stadium under construction. The overall color palette is dominated by yellow and grey tones.

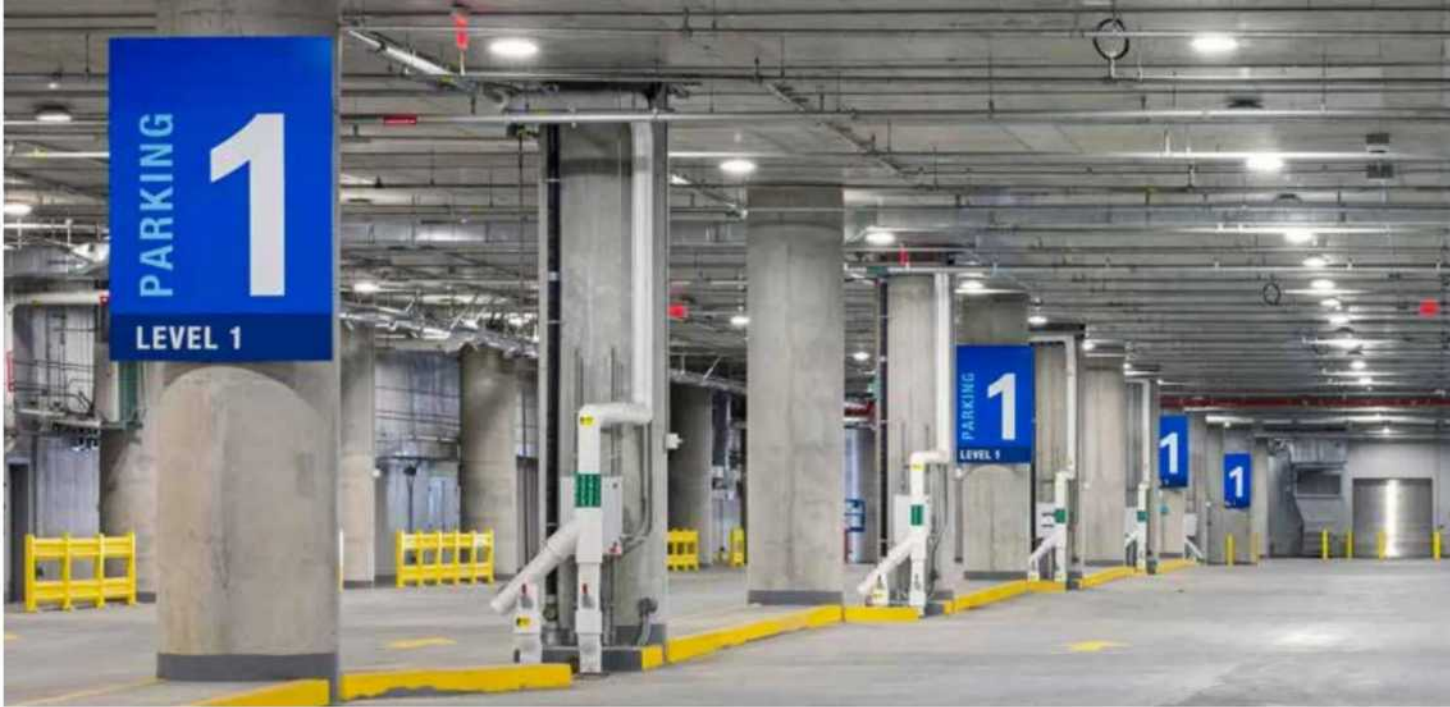

REBUILD

As the Javits Center moves rapidly toward a full event schedule, several key infrastructure projects were implemented in recent months to better enhance the 24/7 operation and provide an unparalleled experience to customers and business partners.

These innovative projects are certain to set a new industry standard among event venues and will generate even more interest among event organizers, meeting planners and corporations across the globe.

NEW LOGISTICS MANAGEMENT SYSTEM

We launched a new state-of-the-art software platform to streamline, accelerate and track truck marshaling activities for all events at the Javits Center.

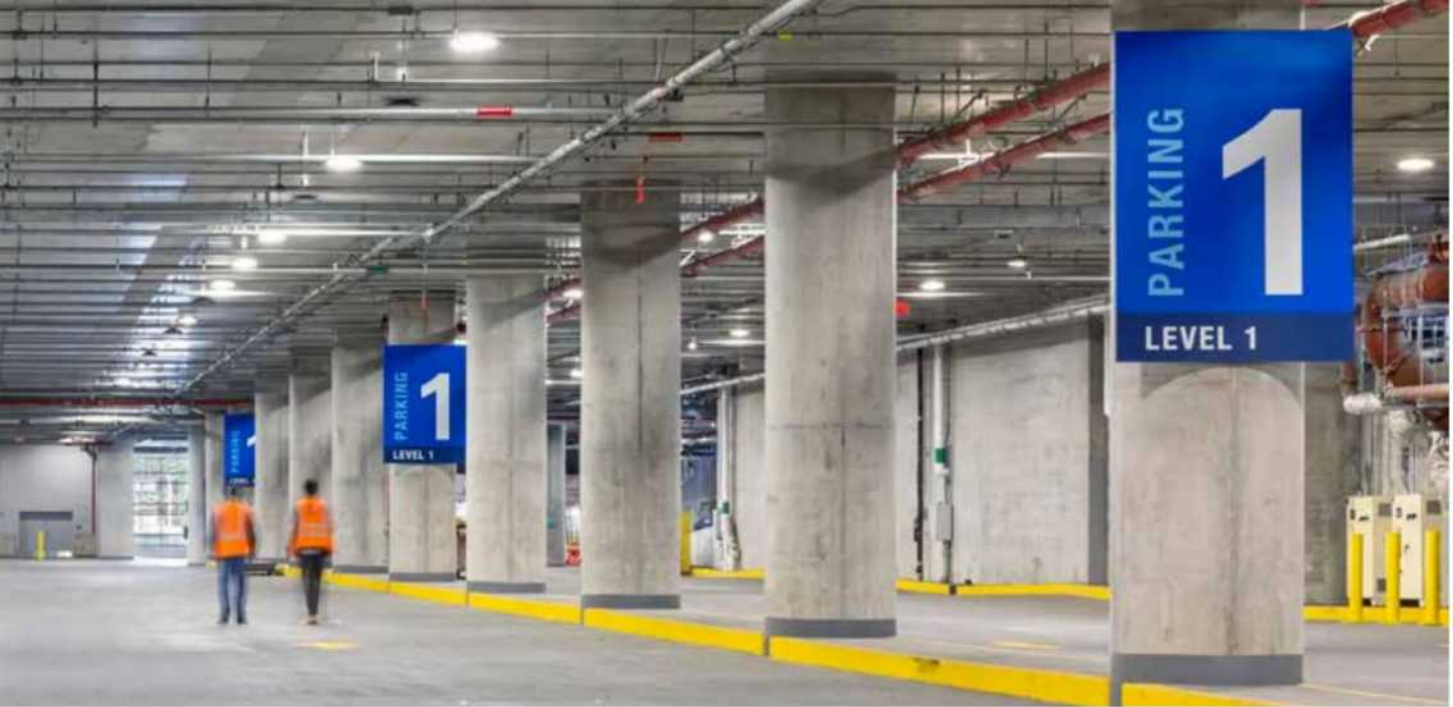

This first-of-a-kind logistics management system, which can be monitored remotely, is being utilized as part of the new, four-level truck marshaling facility, which was completed last year as a part of the 1.2 million square-foot expansion. This system significantly increases the efficiency and security of the intricate process by which trucks deliver and retrieve event-related materials throughout the year. All contractor and exhibitor scheduled freight deliveries or collections can be scheduled in advance through this platform.

Every year prior to the pandemic, thousands of trucks would visit the Javits Center to deliver or retrieve event-related materials, and with this new marshaling facility, thousands of staged trucks are relocated off local streets surrounding the Javits Center and into

the facility. As a result, area congestion and pollution are significantly reduced, improving the quality of life for residents and local businesses.

The new platform provides a real-time scoreboard of all event vehicles located within the Javits Center campus and dock availability through digital recognition cameras using advanced analytics.

NEW LIGHTING SYSTEM

A state-of-the-art lighting system has been installed in The Overview, the 54,000 square-foot special event space constructed as part of the recent expansion. Housed in the ceiling of this soaring space overlooking the Hudson River, this new lighting system contains more than 220 professional-grade LED Moving Lights that can provide lighting and color enhancements for any announcement, gala or dinner. Most importantly, these lights will help reduce overall costs for our customers, now and in the future.

BUILDING SAFETY SYSTEMS

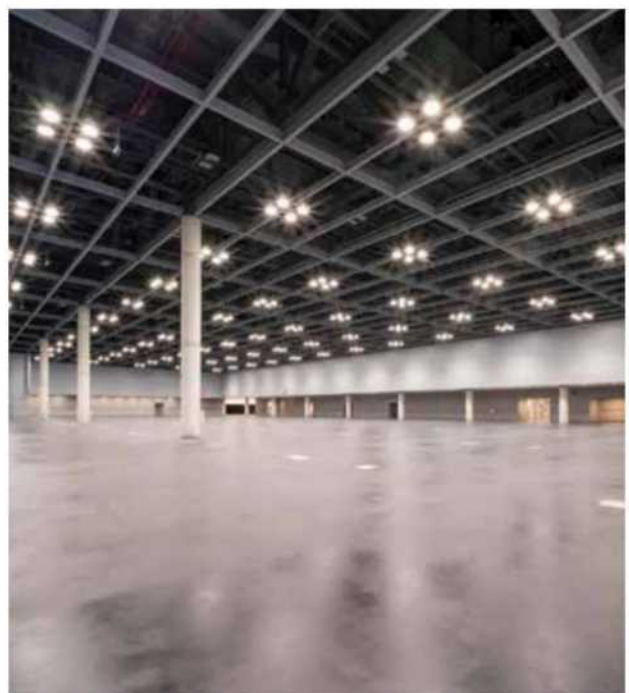

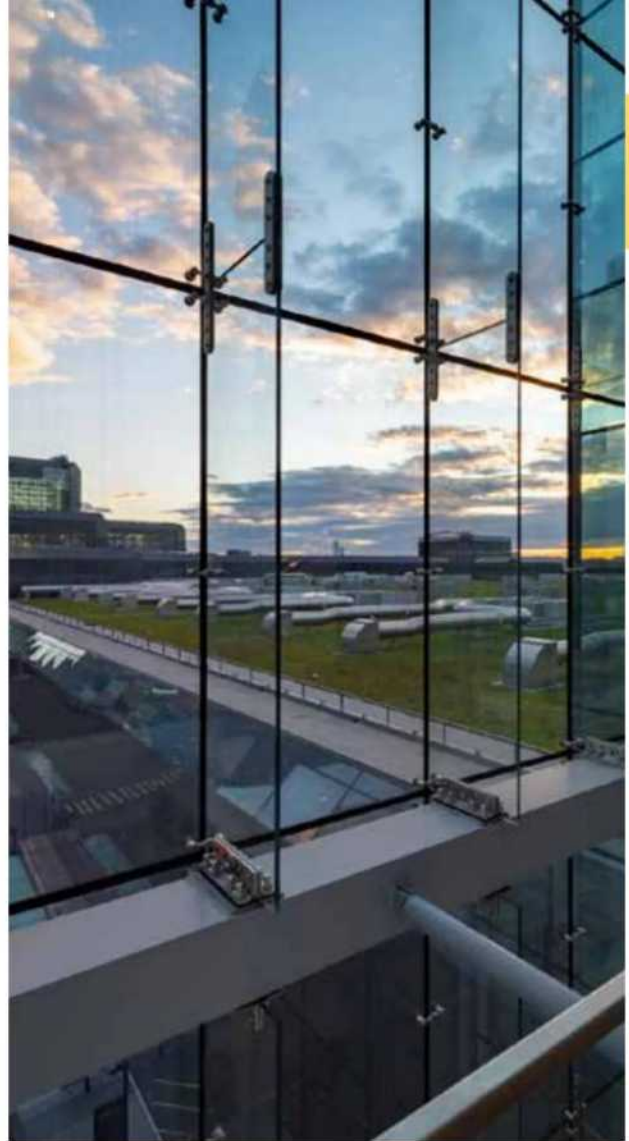

A new building-wide fire alarm system has been installed at the Javits Center, providing a significant upgrade from the original system implemented when the convention center was constructed in the early 1980s.

This advanced system offers the latest protection in fire safety, and it is designed to adhere to the latest building standards in New York City. The system is currently undergoing final testing procedures, and it is expected to be fully operational in early 2023.

This comes as other safety features have been added to the six-block campus, including dozens of stainless steel bollards along the perimeter, new security stations and a restricted vehicle entry and exit process. More than 3,000 high-definition security cameras have been installed throughout the property, providing security officers with the ability to monitor all corners of the building via a centralized Command Center. To improve traffic flow and pedestrian safety, all rideshare and taxi vehicles are now allowed into the inner roadway during specific dates and times.

Other infrastructure highlights include:

- **Virus protection.** Enhanced technology systems to protect against malware and increase network reliability throughout the six-block campus
- **Cutting-edge connectivity.** Latest wireless network standard – Wi-Fi 6 – implemented
- **Expanded wireless network.** Hosts up to 140,000 wireless devices simultaneously
- **More bandwidth.** Use of new radios with increased bandwidth campus-wide

SECTION SPOTLIGHT

FEEDBACK WANTED

We've installed these signs in all public restrooms to solicit comments and concerns from our guests – and to ensure our facilities are always properly equipped! On the culinary side, we have a similar program asking customers for feedback on our food and beverages!

The image features a collage of various cityscapes and construction sites. Large, semi-transparent yellow letters spell out 'REIMAGINE' across the top and middle. The background includes tall skyscrapers, a construction site with cranes, and a large stadium-like structure. The overall aesthetic is modern and urban.

REIMAGINE

We've continued to expand our sustainability program, further exploring what it means for a building to be truly sustainable.

From saving energy to saving birds, our sustainable efforts have improved the quality of life for our employees, customers and neighbors, and we've worked hard to build on our previous successes. To demonstrate our ongoing commitment to sustainability, our team members have joined the Net Zero Carbon Events pledge, participated in COP26 in Glasgow, Scotland, and developed our Sustainable Event Guide, which has helped event organizers improve their sustainability by creating metrics, reducing waste and donating food and furniture after the closing of an event.

YEAR OF THE FARM

2022 was the first full season for our new rooftop farm, and it did not disappoint!

Thanks to our in-house caterer, Cultivated, and its Senior Executive Chief Andrew Matthews (right), Brooklyn Grange and our Sustainability team, the farm raised more than 50 crops which were incorporated into the meals served on site. More than eight stories above street level, the farm transformed into a one-acre oasis of fruits and vegetables that created a unique roof-to-table experience for our guests. From corn and cucumbers to red cabbage and radishes, our farmers worked closely with our culinary team to plan, seed and plant crops throughout the year and harvest them for menus selected for upcoming events. In the meantime, day-to-day farm manager Brooklyn Grange also created a hydroponic system inside our rooftop greenhouse to spur even more plant growth – a great bonus to be utilized during the winter months.

JACOB'S HARVEST

For the farm's inaugural season, we created a new line of pickled produce – called Jacob's Harvest – to raise awareness about our new roof-to-table culinary program! The bottled produce is harvested directly from the rooftop farm – which was completed in 2021 as part of the recent expansion – and has been distributed to customers and visitors throughout the year. Thanks to Brooklyn Grange and their farmers, the rooftop farm is expected to generate up to 40,000 pounds of annual produce. From arugula to zucchini, the various crops being grown are incorporated into the customized meals served during events on site. The first batches of Jacob's Harvest are pickled radishes, cucumbers, banana peppers and red cabbage – a small taste of what our guests experience.

FOOD FOREST

To further our environmental commitment, our Sustainability team also created a food forest on our expanded rooftop in order to mimic the ecological benefits and produce dynamics found in forests. With seven distinct layers stacked vertically, a food forest is designed to increase the biodiversity, efficiency and sustainability of food production systems. Planted in our 10,000 square-foot rooftop orchard constructed as part of the recent expansion, this food forest amplifies the ecosystem services already supplied by the Javits Center's green roof and farm, including stormwater mitigation, thermal regulation and forage and habitat for area wildlife.

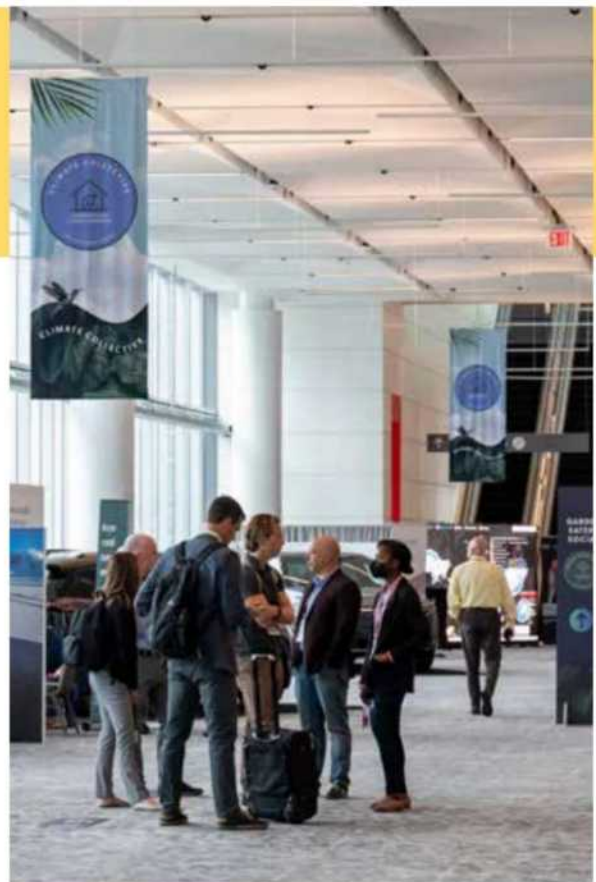

CLIMATE WEEK NYC

The Javits Center became a central point for Climate Week NYC in 2022 – with many climate-focused events hosted in our expansion.

From the United National Global Impact Summit to the Nest Summit Campus to a news conference with Governor Hochul and New Jersey Governor Phil Murphy, the convention center served as a nexus where innovative ideas about combating climate change were exchanged and explored among hundreds of participants. Our CEO Alan Steel delivered remarks at the Nest Summit Campus, and our Director of Energy and Sustainability Jacqueline Tran led a series of tours of our rooftop spaces, including the rooftop farm, greenhouse and orchard.

A WILDLIFE HAVEN

In September 2022, members of NYC Audubon identified the 51st bird species on our 6.75-acre green roof, a remarkable achievement for our rooftop ecosystem.

Since the installation of bird-safe glass during the 2009-2014 renovation, bird collisions decreased more than 90 percent, and the convention center has transformed into a haven for area wildlife, including five bat species and thousands of arthropods. As a result, the Javits Center has inspired bird-friendly legislation – in New York and across the country – and served as a model for the impact of such retrofits. As part of the recent expansion, bird-safe glass was installed across the entire façade, including the rooftop greenhouse. For our environmental efforts,

NYC Audubon honored the Javits Center during its Fall Roost in September, presenting CEO Alan Steel and the Executive Team with a prestigious award.

Four new bee hives were added to the expansion rooftop as well, bringing the total to nine bee hives on our massive rooftop. Each hive houses 80,000 to 100,000 bees, and with beekeeper Astor Apiaries, we harvest our own honey, which is incorporated into our culinary menu and bottled for distribution to guests.

SOLAR IN THE SKY

We completed the installation of 1,400 solar panels on our 6.75-acre green roof in September 2022, supplemented by a 3.5-megawatt battery storage system. Stemming from a public-private partnership among the Javits Center, the New York Power Authority (NYPA), and Siemens Industry, Inc., the system is the largest single rooftop solar project in Manhattan and includes one of the highest-capacity energy storage systems. The solar array is expected to generate up to 10 percent of the convention center's energy needs, reinforcing our position as a model of sustainability.

“[The Javits Center is now] home to Manhattan's largest single-rooftop solar array with an accompanying battery storage system and is setting an example for other urban commercial buildings of how to be on the cutting edge of our clean energy future,” Governor Hochul said.

SECTION SPOTLIGHT

CHANGING CLIMATE

Today Show legend Al Roker and Bill Nye the Science Guy filmed a promotional segment on the Javits Center's rooftop in August and met with some of our employees to discuss the benefits of sustainability and the need for other buildings to join the fight against climate change.

The background features a collage of various cityscapes and construction sites. Large, semi-transparent yellow letters spell out 'RECONNECT' across the top and middle. The word 'RECONNECT' is written in a bold, black, sans-serif font, centered horizontally. The letters 'R', 'E', 'C', 'O', 'N', 'N', 'E', 'C', 'T' are positioned within the larger yellow letters. The collage includes images of modern glass skyscrapers, older brick buildings, and construction sites with cranes and scaffolding. The overall color palette is dominated by yellow, grey, and blue tones.

RECONNECT

JAVITS...CARES

Thanks to the participation from our event organizers and exhibitors, JavitsCares has become a tremendous success since the program was formed several years ago.

Under the program, our staff works closely with industry members to identify items that can be donated after the closing of an event, including chairs, tables, shelving and food items. By working together with customers and business partners, our Sustainability team has been able to facilitate the donation of more than 174,000 pounds of furniture and food items to non-profit organizations throughout New York City. It's a key part of our Corporate Social Responsibility program and allows us to engage with community members in new and impactful ways.

For example, in 2022:

- More than 13 trailers of furniture, household items and school/art supplies were donated to Materials for the Arts, NYC's largest creative reuse center, where it was distributed to local schools and art non-profit organizations.
- Hundreds of plants used to decorate the showfloor at the New York International Automobile Show were donated via Raeri to Synergy Urban Garden 2.0, a community garden center in the Bronx that provides a safe space for families to collaboratively grow food and learn horticulture. Additional plants also were provided to House of Good Deeds and GrowNYC.
- Several thousand meals were donated via Catering for the Homeless to the Cathedral Church of Saint John the Divine's Community Cares program in West Harlem, and several thousand pounds of fresh produce was donated to ReThink Food with the help of our Brooklyn Grange partners. Rethink Food is a non-profit organization fighting food waste and hunger by upcycling produce and catering left behind into

Congratulations to our Vice President of Set-Up and Event Solutions Michael Ruberry who retired in 2022 after more than four decades in the events industry. At the Javits Center, Mike launched the JavitsCares program and helped steer the organization through our operations as an emergency hospital and vaccination center. As a result, the New York chapter of International Association of Events and Exhibitions recently awarded Mike with the prestigious King's Glove Award!

AMBASSADORS

With a great story to tell across six city blocks, we have established a new team of Ambassadors dedicated to providing building tours throughout the year.

With weeks of training sessions across all departments, these part-time employees give an inside look at our operations to community members, customers and other organizations interested in our recent accomplishments – from the vaccination center to our latest energy-saving efforts. Anyone interested can book a tour online and learn how the Javits Center transformed into a model of sustainability, while operating the busiest

convention center in the nation. It's the latest step in our Corporate Social Responsibility program, which includes college scholarships, food donations and educational tours for local students. Thanks to our Ambassadors, the tour program successfully launched in May 2022, and we anticipate the demand to continue to grow in the months and years ahead.

JAVITS JUNIORS SCHOLARSHIP PROGRAM

Supporting New Yorkers of all ages is a central part of the Javits Center's mission, and that's why we were proud to have distributed \$60,000 in college scholarships to six students from high schools on Manhattan's West Side.

In the fifth year of the Javits Juniors Scholarship Program, each student was awarded a \$10,000 scholarship after winning an essay competition among their peers. A ceremony was held in the Crystal Palace with the winning students from the Urban Assembly School of Design and Construction and the High School for Fashion Industries, along with school officials, friends and family members. Many thanks to the Marian B. and Jacob K. Javits Foundation and our business partners – Emerald, Informa and MetroMultiMedia – which donated the scholarship funds, as well as the New York City Department of Education and Fund for Public Schools which administered the funds.

SECTION SPOTLIGHT

We honored more than 250 employees at our annual Employee Service Awards ceremony in November, celebrating their commitment to the Javits Center and our event operations.

As a result of their dedication, the convention center has bounced back in a big way and continued to support the region's economy. Sixteen individuals listed below were recognized for 30 and 35 years of outstanding service, supporting the venue since it first opened in 1986:

Josephine Ansah

THANK YOU

Thank you to all of our customers and business partners for your continued support during these extraordinary times. Your business is greatly appreciated, and we look forward to working together to move our economy, our industry – and our world – forward.

THE YEAR AHEAD

More than two years after the COVID-19 outbreak, New York City is coming back stronger than ever! Our sidewalks, our transportation hubs and our event halls are filling up with people looking to reconnect again – and it's a great feeling to get back to business!

Despite the challenges related to the pandemic, we've continued to invest in the convention center, improving our operational systems so we're more efficient than ever. From our new truck marshaling facility to our rooftop farm, we're creating a safe

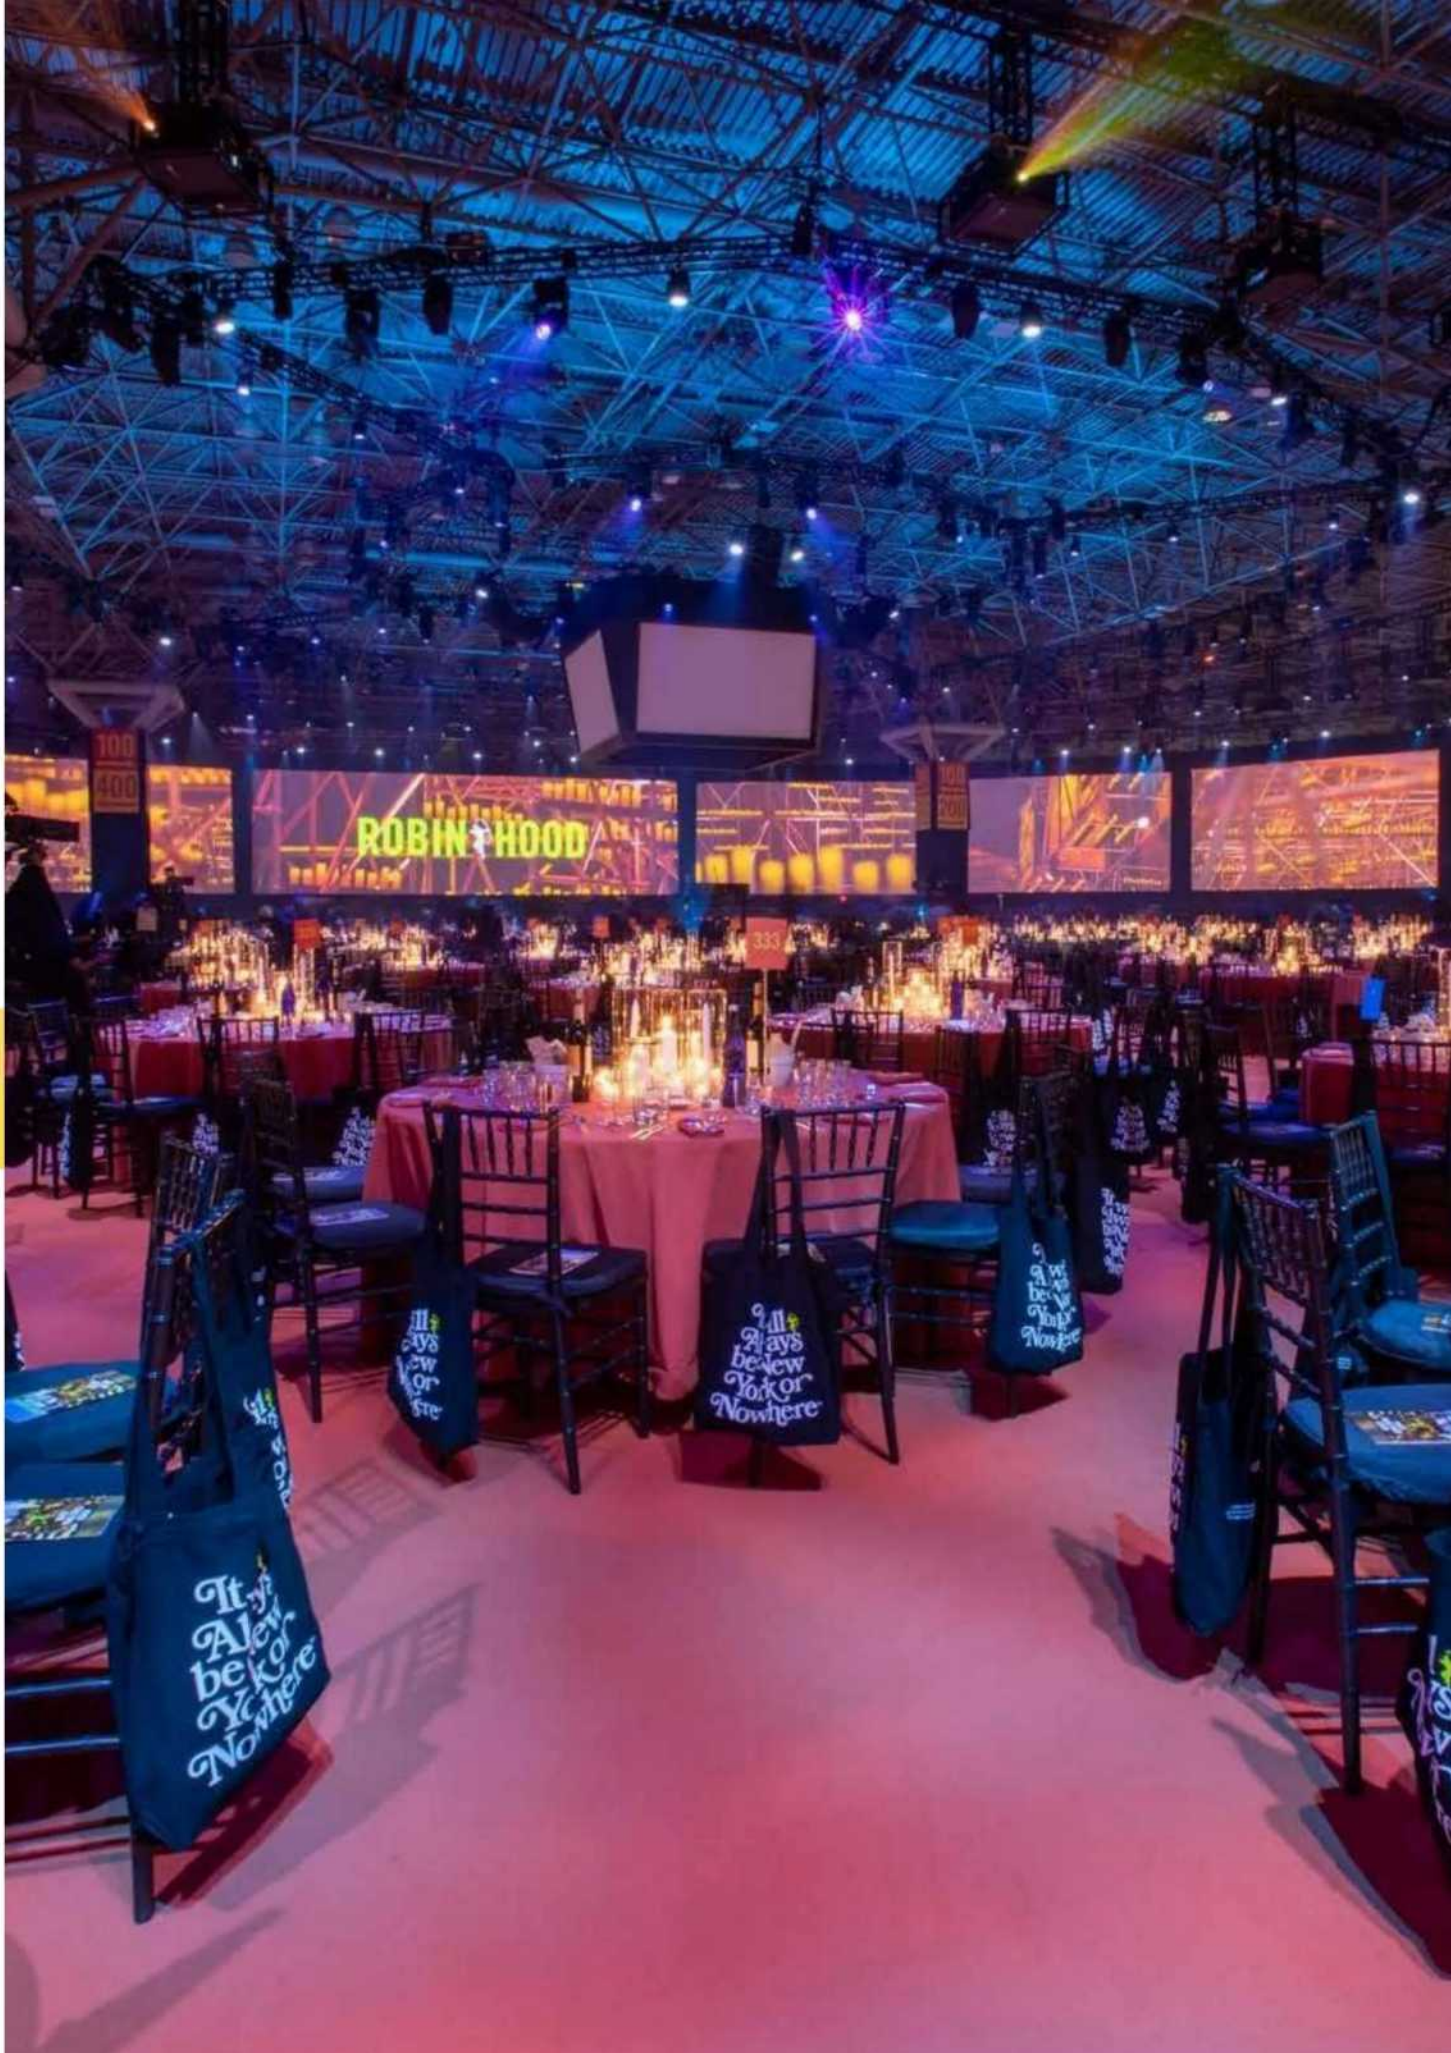

and sustainable environment that's serving as a nationwide model for other venues.

With demand for in-person events steadily growing, we're expecting to reach pre-pandemic levels of activity by 2024, meaning more events and more economic opportunities for New Yorkers. And while events continue to offer hybrid components, nothing can replace the energy and excitement that comes with meeting in person, sharing ideas and experiencing the latest industry trends.

That's why New York City is a top destination for events around the world.

That's why we've become an international hub of commerce and culture.

That's why tomorrow starts here – today.

Year in Review 2022
